November 6

		activity	talks
900	**930**	**registration and coffee**	
930	**1000**	**welcome**	
1000	**1130**	**Session 1: Landscape management for pollinator and pollination mitigation**	
1000	1030	David Kleijn	Strategies to mitigate wild pollinator and pollination loss
1030	1045	Arnon Dag	Improving pollinators abundance by cattle grazing management
1045	1100	Marta Galloni	Analysis of the habitat and the pollinator community of the rare plant *Dictamnus albus* aimed at the integrated conservation of the plant-pollinator system.
1100	1115	Zbigniew Koltowski	The chance for pollinators by improving of bee forage on arable land
1115	1130	Tiziano Gardi	Rural development plans: "Operatrion Pollinator" for conservation of Honeybees and other pollinators
1130	**1200**	**coffee break**	
1200	**1340**	**Session 2: New developments in crop pollination (1)**	
1200	1230	Virginie Boreux	Global evaluation of pollinators in agricultural crops
1230	1245	Chiara Polce	Orchards and pollinators climate-driven shifts, fifty years from now in Great Britain.
1245	1300	Danilo Bevk	Using honeybees to improve pollination of strawberries and to deliver biological fungicide for protection from grey mould (*Botrytis cinerea*).
1300	1315	Michael Garratt	Apple pollination in the UK: studying pollinators, yeld, quality and economic value.
1315	1330	Vasuki Belavadi	Role of flower visitors in pollination and pod set of Pigeon pea, *Cajanus cajan* (L.) Millsp
1330	**1420**	**lunch**	
1420	**1650**	**Session 3: Pollinators, diseases and pesticides**	
1420	1500	Peter Neumann	Small hive beetles in Europe
1450	1520	Robert Paxton	Emerging diseases-native and exotic-as a major cause of honey bee decline
1520	1535	Fabio Sgolastra	Standard methods for toxicology studies on *Osmia* spp.: Toward an environmental risk assessment for solitary bees.
1535	1550	Oliver Schweiger	Effect of agrochemicals on wild pollinators across different spatial scales
1550	**1610**	**coffee break**	
1610	1640	Dave Goulson	Bees feel the squeeze; interacting stressors underlie pollinator declines
1640	1710	Sydney Cameron	Testin the invasive pathogen hypotesis of north american Bumble Bee (*Bombus*) decline
1710	1725	Mark Brown	Pollinator plagues – emergent multi-host pathogens in bees?
1725	1740	Franco Mutinelli	*Aethina tumida* detection in southern Italy and first reaction measures adopted
1740	1755	Salima Koumad	*Varroa destructor* resistance to Apistan and Bayvarol in *Apis mellifera intermissa* colonies.
1755	**1815**	**coffee break**	
1815	**1950**	**Session 4: Bee Flora, Bee education and society**	
1815	1830	Giovanni Dal Monte	Phenological forecast as a tool for nomadic beekeeping: the example of iphen project
1830	1845	Monica Vercelli	Melliferous potential yield of Torino city (Piedmont, northwestern Italy)
1845	1900	James Hutagalung	Potential management vegetable *Brassica juncea* and sunflowers for support animal feed as settled in bee…
1900	1915	Santina Grisanti	From the development of autonomy of the human social sicula black bees individual in society
1915	1930	Mirko Pacioni	Lubriano, a school of beekeeping in the territory of ecomuseum "Tuscia rupestre"
1930	1945	Junus Mochammad	The potential for wild bee honey production
2030		**SOCIAL DINNER**	

November 7

		activity	time	talks
900	**930**	**registration and coffee**		
930	**1100**	**Session 5: Beekeeping for pollination and honey production**		
930	945	Awad Awad		Performance of adapted and non-adapted honeybees (*Apis mellifera* L.) to forage *Acacia gerrardii* Benth. Under stressfull dry-hot subtropical summer
945	1000	Paola Ferrazzi		Melissopalynological characterization of the Lanzo Valleys honeys (Piedmont, northwestern Italy) as a reference for alpine productions and biodiversity conservation
1000	1015	Teresa Renzi		Bee health monitoring and reporting system in Italy: main outcomes and perspectives
1015	1030	Sandra Evans		Electronic beehive monitoring - applications to pollinator research
1030	1045	Claudia Garrido		Climate change and apiculture: possible impacts on plant phenology, honey bee health and production
1045	1100	Carol Poole		Landscape-level management of honeybee forage resources: early lessons from South Africa's awareness-raising
1110	**1140**	**coffee break**		
1140	**1310**	**Session 6: New developments in crop pollination (2)**		
1140	1210	Brad Howlett		The role of wild pollinating species in New Zealand crop pollination
1210	1225	Osman Altayeb		The efficacy of honeybees on the production of Sunflower seeds in the Sudan
1225	1245	Krell Rainer		Testing an expanded biodiversity concept for pollination systems based on scientific and indigenous knowledge
1245	1300	Dino Martins		Kenya awareness of pollinators and pollination
1300	**1400**	**lunch**		
1400	**1620**	**Session 7: Wild bees and wild flora**		
1400	1415	Thibaut de Meulemeester		Automated Identification system for bees
1415	1430	Laura Bartolotti		The role of nectar aminoacidic composition in plant-pollinator relationship
1430	1445	Jesús Aguirre-Gutiérrez		Susceptibility of pollinators to landscape change depends on past landscapes, recent change and pollinator identity
1445	1500	Leon Marshall		Ground-truthing species distribution models: bees in agricultural habitats as a case study
1500	1515	Jacques Fabry		No need for pesticides to disorient amounts of pollinators
1515	1530	Antonella Canini		Nutraceutical properties of honey and pollen produced in a natural park
1530	**1600**	**coffee break**		
1600	**1830**	**Session 8: Global Pollinator Project: Economic Valuation**		
1600	1630	Lucas Garibaldi		FAO
1630	1640	Breno Freitas		Socio-economic profile of cashew growers in North-eastern Brazil and their pollinator friendly-practices
1640	1650	Peter Kwapong		FAO
1650	1700	Muo Kasina		Assessment of pollination value in agriculture: experiences working with small-scale farmers in Kenya.
1700	1710	Kedar Devkota		Economics of pollination management practices adopted by farmers in chitwan district of Nepal
1710	1720	Rashid Mahmood		FAO
1720	1730	Ranbeer Rawal		Farmers need awareness on socio-economic and ecological value of good agricultural practices- a case of pollinator friendly practices in the Himalaya
1730	1745	Discussion		
1745	**1800**	**Closure**
